Stone Storm

A cartoon physics siege game for Android. Load the catapult, fling stones, fire pots, bombs and cyclones, bring down enemy fortresses, and defeat the archers before their arrows wipe out your soldiers.

- Engine: Godot 4.7 (GDScript), Android only, Google Play.
- Status: 1.0.0 (code 9) is in Play closed testing with testers; 1.1.0 (code 10, 75 levels, Stone Storm) replaces it there and is the build that goes to production. Release steps: `docs/RELEASE_1_1_0.md` (1.1.0), `docs/FINAL_RELEASE_STEPS.md` (first launch); management: `docs/RELEASE_GUIDE.md`.

Quick start

1. Open Godot 4.7 → Import → select `project.godot`.
2. Press F5 to play.
3. Android: Project → Export → "Android" → Export Project (debug APK), or see `docs/PLAY_STORE.md`.

Documentation

Not sure which doc to open? Start with docs/WHICH_DOC.md.

Doc	What it covers
AGENTS.md	Rules and commands for anyone (human or AI) changing the code
docs/ABOUT.md	Vision, story, audience, pillars
docs/GAME_DESIGN.md	Rules, projectiles, units, materials, scoring
docs/LEVELS.md	Campaign structure, level format, level list
docs/SIGNATURE_FEATURES.md	The six signature pillars and the Phase D plan
docs/UI_DESIGN.md	Home, map, HUD, menus, results and the icon set
docs/ART_DIRECTION.md	Style, palette, characters, asset list
docs/AI_ART_PROMPTS.md	Prompts for AI-generated art and where files go
docs/AUDIO.md	Sound design plan and sources
docs/MONETIZATION.md	Ads, IAP, economy, pricing rationale
docs/RELEASE_GUIDE.md	**Owner manual**: build, test safely, upload, go public, updates, money, management (`tools/release.py`)
docs/OWNER_SETUP_ADMOB_BILLING.md	Step-by-step owner guide: keystore, AdMob, Play products, test users, how to test
docs/BILLING_SETUP.md	Play Console products, testing, regional prices, verification server
docs/FIREBASE_SETUP.md	Firebase Analytics + Crashlytics setup, events, Data safety answers
docs/NOTIFICATIONS.md	Local reminders: rules, triggers, copy, push decision
docs/POLICY_AUDIT.md	Play / AdMob / Billing compliance checklist
docs/TECH_STACK.md	Engine, plugins, tooling, versions

Doc	What it covers
docs/ARCHITECTURE.md	Code structure, scenes, data flow
docs/PLAY_STORE.md	Release checklist for Google Play
docs/ROADMAP.md	Phases and milestones
docs/CREDITS.md	Third-party assets and licences
docs/reference/	Notes from the old HTML prototype
